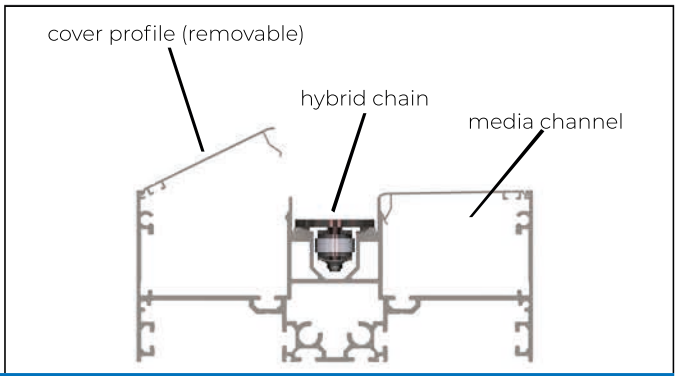
BACHTEL GROUP

Plate chain conveyor PKF 2.0

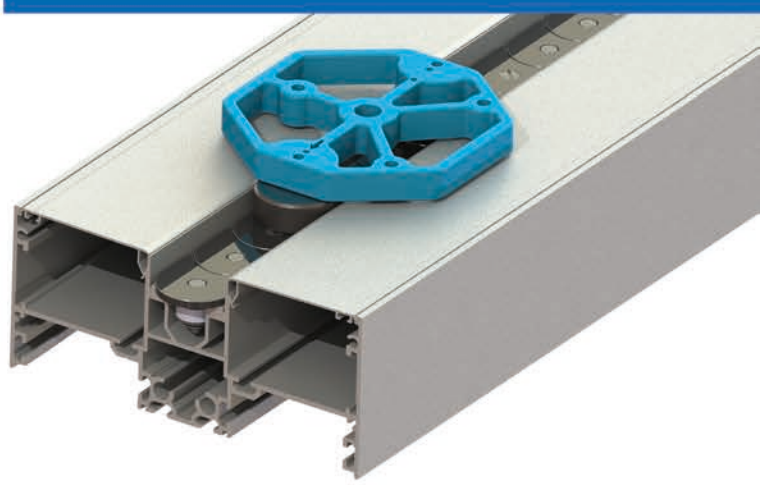
The Altratec Plate Chain Conveyor PKF 2.0 is a modular transfer system for workpiece carrier transport that is optimally tailored to customer requirements. Its internal honeycomb structure enables large unsupported spans.

In addition to the visually appealing closed outer shell with an integrated media channel on both sides, the system stands out for its excellent accessibility and resulting ease of maintenance.

Compatibility with other systems was also taken into account during development, allowing existing installations to be easily expanded with the PKF 2.0. The system can be used in almost all areas of automation and material flow and is also suitable for higher loads and harsh environments.



#modular #robust #cost-effective



Features

- ☑ clean look
- ☑ hybrid chain
- ☑ integrated chain guide
- ☑ large spans, high section modulus
- ☑ enclosed media channels
- ☑ removable cover profiles
