

COLUMN LIFT

The lift for your loads

- Quickly overcoming great heights
- High working load, rugged design
- Different drive concepts
- Special automotive version available for delivery

Design

Sturdy steel square columns as bearing element

Precise guidance of carriage in U-shaped steel rails

Silent and low-vibration travel thanks to combination rollers with polyamide or polyurethane coating

Low-maintenance thanks to use of bearings that are sealed for life

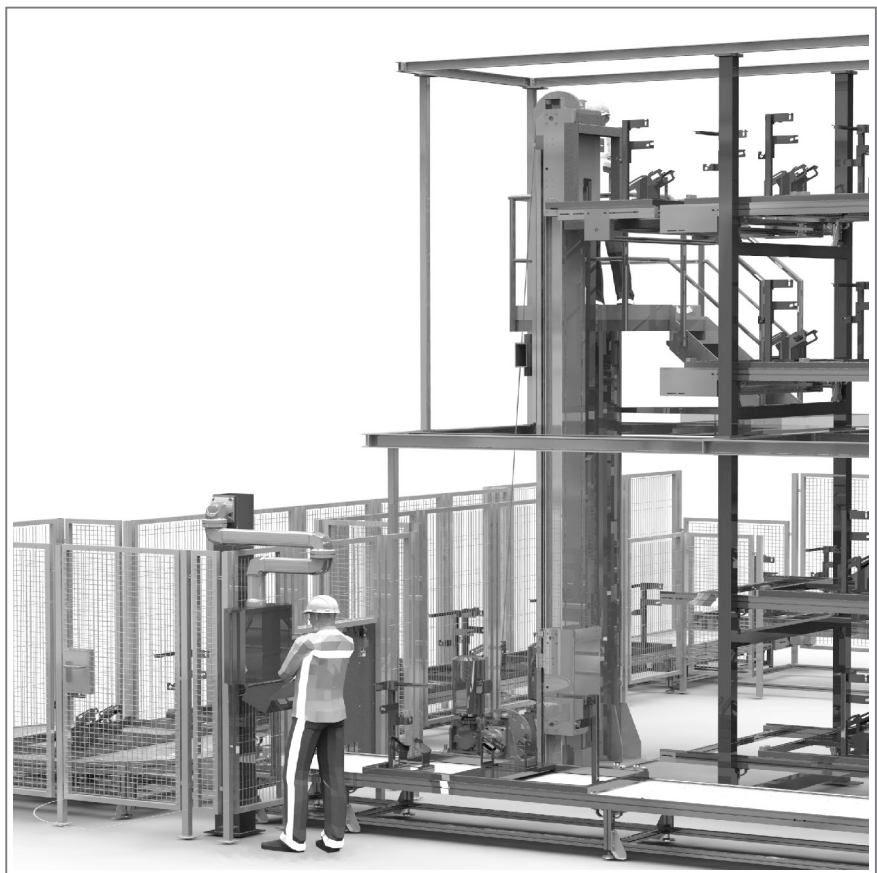

Flexibly adapted to your application

Version as chain, synchronous belt or rope lift

Versions possible having either drives with positioning via sensors or controlled drives with position transducers

Lift heights possible over several hall levels

Carrying capacity of up to approx. 500 kg (higher loads possible on request)
